EDUCATION

- 01/2013 – 04/2016** **Ph.D.**
Department of Psychology, University of Padua
Doctoral School of Psychology – Cognitive Sciences Program
Supervisor: Prof. Marco Zorzi
- 10/2006 – 07/2011** **M. Sc., 110/110 cum laude**
Department of Psychology, Bicocca University of Milan
Psychology – Clinical, Developmental and Neuro- psychology
Supervisor: Prof. Giuseppe Vallar

EMPLOYMENT

- 01/2023 – current** **Assistant Professor (RTDa)**
Dept. Of Neuroscience, Psychology, and child's health
University of Florence
via di San Salvi, 12, building 26 – 50135, Firenze (FI), Italy
- 05/2020 – 05/2022** **Senior Postdoc Fellow (type B fellowship)**
Department of General Psychology, University of Padua
via Venezia 12/2 – 35131, Padova (PD), Italy
- 02/2018 – 02/2020** **Marie Skłodowska Curie Research Fellow**
ImpAct Team, INSERM, CNRS, Centre de Neuroscience de Lyon, and
University Claude Bernard of Lyon
16, av. Doyen Lépine – 69500, Bron Cedex, France
- 06/2016 - 01/2018** **PRESTIGE, Marie Skłodowska Curie Research Fellow**
ImpAct Team, INSERM, CNRS, Centre de Neuroscience de Lyon, and
University Claude Bernard of Lyon
16, av. Doyen Lépine – 69500, Bron Cedex, France
- 01/2013 - 04/2016** **Ph.D. Candidate**
Department of General Psychology, University of Padua
8, via Venezia – 35131, Padova (PD), Italy
Supervisor: Prof. Marco Zorzi
- 02/2015 – 09/2015** **Visiting Ph.D. Student**
ImpAct Team, INSERM, CNRS, Centre de Neuroscience de Lyon
16, av. Doyen Lépine – 69500, Bron Cedex, France
Supervisor: Dr. Alessandro Farné
- 03/2012 – 12/2012** **Research Assistant**
Department of Psychology, Bicocca University of Milan
1, p.zza Ateneo Nuovo – 20126, Milano (MI), Italy
Supervisor: Prof. Giuseppe Vallar

7/2011 – 03/2012**Research Assistant**

Department of Brain Rehabilitation, IRCCS – Istituto Auxologico Italiano
 32, via Mercalli – 20122, Milano (MI), Italy
 Supervisor: Dr. Roberta Ronchi

SKILLS**Advanced**

R – a Language for Statistical Computing ([link](#)); Python ([link](#));
 MATLAB ([link](#)); OpenSesame ([link](#)), PsychoPy ([link](#)), E-Prime ([link](#));
 Neuropsychological assessment ([link](#)); Statistical and Computational
 modelling ([link](#)); brain stimulation ([link](#)) ([link](#)); Eye-Tracking ([link](#));
 Virtual Reality ([link](#)) ([link](#)); fMRI ([link](#)) ([link](#)); Pupillometry, heart rate
 recording ([link](#));

Languages

Italian (native), English and French (fluent).

Other**skills/interests**

Voracious devourer of music and literature. During my spare time I
 occasionally write short novels or dialogues. Almost decent cook.

CREATIVITY, INDEPENDENCE, STRENGTHS: A NARRATIVE REVIEW

Before moving to Padua for my Ph.D. (2013), I underwent a long training as a research assistant in Milan, both in a clinical (2011-2012) and academic (2012) setting. After my M.Sc. degree (obtained the 5th July 2011), I spent several months in a clinical research institute (Italian Auxological Institute, Milan), working with patients with sustained brain damage and handling neuropsychological research. Afterwards, starting from the experience in the numerical cognition field, I proposed a novel paradigm to study spatial aspects of magnitude(s), and finalised the project under the supervision of Prof. G. Vallar (Blini et al., 2013) within the Bicocca University of Milan laboratories. Previous collaborations in the same topic and clinical population were made with researchers abroad (M. Pesenti and S. Di Luca, Catholic University of Louvain, Belgium). At the very beginning of my Ph.D., supervised by Prof. M. Zorzi (2013), I was introduced to the clinical setting of the San Camillo hospital in Venice – an excellence centre well renowned for the high quality clinical research. Here, I started handling an ambitious trial involving neurological patients and a novel (proved more sensitive) diagnostic tool for spatial attention disorders (in collaboration with Dr. F. Meneghello; Blini et al., 2016). Within the same project, the acquisition of neuroimaging data (fMRI and EEG) took place, in collaboration with Prof. A. Venneri and Dr. C. Spironelli. I also acquired direct experience with fMRI acquisitions and analysis later on (2014) in the context of a functional neuroimaging study of the very same task performed by healthy individuals (University Hospital of Padua). I became interested in vestibular aspects of cognition in 2013, and soon independently approached the otology section of the City Hospital (Prof. A. Staffieri, Dr. G. Marioni), meeting keen interest from the medical community. The novel idea was to translate my expertise with attentional disorders to a different clinical population, namely patients with vestibular disorders. A further diagnostic trial, using state-of-the-art tools and sensitive tasks, was therefore established. One year after this first approach (2014), I became interested in vestibular stimulation (VS) techniques and their potential impact. Given the lack of expertise in my university, I approached Prof. P. Brugger and Dr. B. Lenggenhager from the University Hospital of Zurich (Neuropsychology Unit, Department of Neurology). I was awarded with my Ph.D. in April 2016. I am since willing to understand whether VS, that is known to activate deep-limbic regions of the brain, may also modulate reward-related aspects of cognition and interoceptive processing. For this reason I approached in 2014 Dr. A. Farné, based in the INSERM U1028 unit in Lyon (FR), with whom I envisaged, after a seven months research stay in 2015, studies with VS in both healthy and neurological patients. Besides, I further refined state-of-the-art neuroimaging techniques by taking advantage of the presence, in the same hosting institution, of Dr.s F. Hadj-Bouziane, D. Meunier, and E. Macaluso. These projects received funding by the People Programme (Marie Curie Actions) of the European Union's Seventh Framework Programme (FP7/2007-2013) through the PRESTIGE programme

coordinated by Campus France in 2016-2017, and then by a further Marie Curie individual fellowship (H2020). Since 2020, I am a senior postdoc fellow at the Dept. of General Psychology, Padova, where I plan to pursue experimental and translational research. While the mere bibliometric indices do not reflect yet this multifaceted journey in science – in that mobility, responsibilities as a young PI, and tendency to favour quality and rigor in research came at the expenses of more quantitative aspects – the following strengths can be duly documented: i) the strong mobility track-record, which resulted in a rich network of European collaborations. ii) the range and diversity of topics covered by my research (numerical cognition, spatial neglect, peripersonal space, vestibular system, interoception, machine learning approaches for fMRI). iii) the high degree of creativity in research which, also in light of interdisciplinary and translational aspects, was awarded with several prestigious grants. iv) the rigor of open science practices, including registered reports and established pipelines to share data, materials, and computer code. v) the strong track-record of quantitative methods for research in the behavioural sciences, which encompasses state-of-the-art statistical, machine learning, and computational modelling techniques. vi) excellent coaching, mentoring, and collaborative predisposition for the aforementioned strengths (contribution acknowledged in the following papers for which authorship was not claimed: Thibault et al., 2021, *Science*; Pélissier et al., 2018, *Neuroimage*; Reynaud et al., 2019, *Neuropharmacology*).

ACADEMIC FUNDING, AWARDS, AND ACHIEVEMENTS

- 2021-2022** **STARS@UniPD 2021 for the project HARVEST**
Scouting program of the University of Padova to retrieve ERC applicants. The project was eventually granted funding of 110 k€ for 2 years, though at that point I had to decline it to later accept a position in Florence.
- 2020 – 2022** **Senior postdoc (type B) fellowship – Departments of excellence**
The public competition (based on a project as PI) was made possible thanks to a grant from MIUR (Departments of Excellence DM 11/05/2017 n. 262) to the Department of General Psychology, University of Padova. ~50k€, 2 years
- 2017 – 2020** **Marie Skłodowska Curie individual fellowship (IF-746154)**
Funded under the European Union's H2020 Program to study the link between the vestibular system and motivation. Application number: IF-746154 (BRAVEST). ~175k€, 2 years
- 2016 – 2017** **PRESTIGE Incoming Mobility co-financing grant.**
Funded by the People Programme (Marie Curie Actions) of the European Union's Seventh Framework Programme (FP7/2007-2013) under REA grant agreement PCOFUND-GA-2013-609102, through the PRESTIGE program coordinated by Campus France. Application number: PRESTIGE-2016-2-0003. ~30k€, 1 year
- 2013 – 2015** **L. 170 grant from the Italian Ministry of Research.**
Theme "New applications for the bio-medical industry", worth one full Ph.D. scholarship. ~50k€, 3 years

COMMISSIONS OF TRUST

- 2022** **Expert evaluator for the Complutense University of Madrid (number: 2024). Evaluator for the Proyecto UNA4CAREER postdoctoral program.**
- 2021 - present** **Expert evaluator for the European Union Horizon Europe framework (EX2019D361005). Evaluator for the HE-MSCA-PF program (Marie Curie program) in the 2021 and 2022 editions.**
- 2013 – present** **Ad hoc reviewer for:** *Frontiers in (Human Neuroscience, Psychology), Cortex, Neuropsychologia, PeerJ, European Journal of Neuroscience, Experimental Brain Research, Psychonomic Bulletin & Review, the PCI Registered Reports initiative.*

SUPERVISING AND MENTORING ACTIVITY

- 2020 – current** 3 Ph.D. students (2 from Lyon, 1 from Padua), and 2 undergraduates (Padua).
- 2017 – 2020** 1 Ph.D. student in a clinical setting (Padua), 3 Ph.D. students (2 from Lyon, 1 from Padua) and 2 undergraduates (Lyon and Padua) in an experimental setting; since 2018, 2 post docs (Lyon and Padua)
- 2013 – 2016** 3 undergraduate trainees in a clinical setting (Padua), 5 undergraduate trainees in an experimental setting (4 from Padua, 1 from Milan)
- 2011 – 2013** 2 undergraduate trainees in a clinical setting, 1 undergraduate trainee in an experimental setting (Milan)
